MAS-P2

PORTABLE GROUP ANIMAL SCALE

Designed for Durability

The MAS-P2's design consists of a weighbridge that is built to support simple, safe animal weighing, paired with a no-gap PolyClead® deck to reduce debris buildup under the scale. The load cells are protected by individual towers at each corner of the scale for reliable, accurate weighing.

Easy to Use

The easy-to-use lift-and-lower lever system on the MAS-P2 allows operators to switch between weigh and transport modes. When in weigh mode, the deck is only 6 inches off the ground, and the low-profile weighing platform makes loading and unloading animals quick, easy and safe. In transport mode, the cage is locked to the base frame to prevent cage movement and load cell damage.

Rugged Versatility

For multisite applications with unpredictable conditions, the MAS-P2 delivers reliable, Legal for Trade weights. When the MAS-P2 is set up with the 920i® weigh center, it provides accurate results even when the scale is off-level by up to 3° (6%) and doesn't require recalibration after moving between sites.

Features

Rice Lake livestock scales are designed with features to support ranchers and livestock, including a PolyClead deck with ¼-inch or ¾-inch lugs and premium-quality powder paint. Two standard, reversible, high-panel gates and a rubber T-belt on entry and exit are also included.

Model	Capacity lb/kg	Deck Dimension (Width × Length)	Outside Dimension (width × length)	Height
MASP2-13	15,000 lb 6,500 kg	7 ft 5 in × 12 ft 9 in	8 ft 4 in × 13 ft 6 in	99 in
MASP2-18	20,000 lb 9,000 kg	7 ft 5 in × 18 ft 6 in	8 ft 4 in × 19 ft 3 in	99 in

7	6670	lb	953
13	13335	lb	1026
24	23340	lb	973 Gross
	22757	lb	948 Net
			2.50% Shrink

ONBOARD WEIGH CENTER

The 920i® weigh center is conveniently mounted on the scale's exterior, allowing all transactions to be easily viewed by the operator. Complete with an integrated printer, legal tickets can be printed for accurate record keeping.

The weatherproof enclosure protects electronics for years of trouble-free use. A USB port allows data to be exported to a spreadsheet. The scale's instrumentation provides a complete report for each batch and lot of animals weighed.
